

Care for Khndzoresk

Project Goal

The goal of the program is to equip primary healthcare centers (PHCs) in the border communities of Khndzoresk and Hartashen of Armenia's Syunik region, with medical equipment and furniture. This will improve access to primary healthcare services and enhance residents' health and quality of life.

Project Background

Khndzoresk and Hartashen are strategically important communities in Syunik due to their location. Supporting the over 2,000 residents to thrive in these communities is vital, and reliable healthcare services contributes to this goal.

Currently the Khndzoresk and Hartashen clinics lack updated and functioning medical supplies and equipment, severely limiting delivery of healthcare services. Meanwhile, regular checkups and early diagnostics are essential for preventing and managing health issues.

Providing modern medical equipment and updated furnishings will greatly enhance the functionality of the clinics, making healthcare delivery more efficient and accessible. Residents will be able to receive care locally, avoiding trips to larger communities, which is especially important as harsh weather often makes roads nearly impassable. Improved access to regular care will raise awareness, support early diagnosis and improve chronic illnesses management, and reduce untreated cases and preventable deaths within the communities.

Budget

Item	Quantity	Amount	Total cost
Medical examination couch	3	80,000	240,000
Electrical heater	2	12,000	24,000
Waiting room bench	1	130,000	130,000
Baby scale w/ height measurement	1	80,000	80,000
IV stand	1	25,000	25,000
ECG machine 6 outputs	1	350,000	350,000
Sterilizer	1	350,000	350,000
Medical removable wall	1	60,000	60,000
Desk	2	80,000	160,000
Chair	4	17,000	68,000
Medicine cabinet	1	150,000	150,000
Card cabinet	1	95,000	90,000
Baby changing table	1	80,000	80,000
