Laptops for Leaders
Budget Report

Project Goal

To fund 30 laptops for the use of students studying computer science, engineering and digital art at ACT College.

Project Background

Built through a strong partnership between FAR, GITC, the Government of Armenia and global supporters, Armenian Creative Technologies (ACT) College combines rigorous academics with hands-on, practical training to equip students with real-world skills and career pathways in high-demand tech fields.

Following the successful launch of its first cohort in 2025, ACT is now preparing to welcome a new incoming class of 80 students—young people selected for their talent, drive, and potential to become Armenia's future tech leaders.

To ensure every student can fully participate in ACT's highly digital, project-based learning environment, the college needs more laptops for classroom and coursework use. Ayo! is supporting the effort by funding 30 MacBook Neo laptops, priced at $600 each. Thank you for helping us empower this new cohort with the tools they need to study well!
